

PLAIN

Description

Bar Grating is available in welded, crimped, or swaged as the method of joining the bars. The flat bar size indicates the height of the bar grating and is referred to as the "Bearing Bar" size. The first number indicates the thickness of the bearing bars, then the height, the width and the length for ordering. Below are the common sizes and types available from stock. Other sizes can be made but require a number of weeks lead time and are more expensive per square foot than those shown.

All Items Also Available in Hot Dip Galvanized

1/8 X 1 X 24 X 288 BAR GRATING
1/8 X 1 X 36 X 288 BAR GRATING
